

TYPE-J Seeker

SEEKER

100 Tons 1,400 cubic meters

Dimensions:

31.5 m x 10 m high x 15 m wide

Crew:

Captain/pilot, Navigator,
Engineer, Gunner

Fuel: 48 tons (2 parsec jump)

Drives:

One Deltic Mark 1051a fusion
power plant, driving one General
Products Mk 1067 Model 1
Jump Drive and two Vantage
Alpha 2G thruster maneuver
drives.

Computer:

LSP Model 1/bis Mk 1081

Capacity:

23 Tons Cargo

0 passengers

0 low berths

Small Craft:

Mining Drones

KEY

- a- Bridge
- b- Computer Model 1/bis
- c- Dual Stateroom
- d- Ore Storage

Maintenance Cost (Monthly)				1,849
Life Support Cost (Monthly)				6,000
Total Tonnage and Cost			100	23,265,000

The wedge-shaped 100 ton Type S Scout/Courier is a common sight on the frontier. Many are in the hands of former members of the Scout Service. One of the most venerable designs in the Imperium, the Type S has been adapted for mining asteroid fields as the Type J Seeker.

The Seeker removes half the staterooms and brings the fuel tank down to a modest twenty four tons. The mining ship carries ten tons of mining drones, and its cargo capacity is increased to twenty-two tons. These small mining ships scavenge the asteroid belts, looking for deposits of valuable minerals. Many Seekers mount a pulse laser in the turret for mining.
